Introduction

The Survey

The General Practice Assessment Questionnaire (GPAQ) surveys how patients perceive their doctor's practice. The survey covers aspects of quality best assessed by asking patients, and most highly valued by patients.

Survey Development

GPAQ was introduced in 2004. This version, GPAQ-R2 (piloted as GPAQ V4), was revised (2012) to encompass GP Revalidation, and the Directed Enhanced Service (DES) for Patient Participation which includes collecting patients' views through a local survey. GPAQ-R2 now includes the Friends and Family Test (Q41).

This Report

For each question, a summary of how many patients responded to each answer within each question is given.

A Note about Numbers /Subtotals

Total figures include those who did not answer the question about sex or age. Therefore where subtotals are given for the split between males and females, and similarly those under and over 45, these may add up to less than figures in the total column.

Benchmarks

Benchmarks are averages, and as such should be treated with caution and in context.

For questions identical, or nearly identical to questions in the GPPS survey, April 2010-March 2011 GPPS national benchmarks (as percentages) are given - as best possible - in a column to the right of your practice results, highlighted in green.

In addition, we have benchmarks from 17,000 questionnaires collected for GPAQ V4, These are given, again as percentages, highlighted in this 'biscuit' colour. For the questions identical to questions in the GPPS national survey, practices may wish to benchmark their results against those from the national survey, for which the numbers collected are much greater.

The table at the end of this report (p21) gives your practice benchmarks together with National Benchmarks from the 17,000 completed questionnaires from piloting GPAQ-R (piloted as GPAQ V4).

Friends and Family Test
Results are given on page 20.

Taking Action on Results

GPAQ has been designed for scores to be used to improve care in your practice. The questions are not vague or general. They relate to specific aspects of care where there is clearly something to be done, if the practice judges that improvement is needed. More information is given in the booklet **"Improving your practice with patient surveys"** which can be downloaded from the GPAQ website:
http://www.phpc.cam.ac.uk/gpaq/files/2014/07/patientsurveyhandbook.pdf

How the Survey was carried out

GPAQ-R2 questionnaires were given out to patients after they had seen the GP.

Most patients don't answer the question as to whether they saw the doctor/nurse today for themselves, their child or for another reason.

Of the   **82**   or   **50%**   who answered the question

    56   saw the GP/nurse for themselves
    25   saw the GP/nurse for their child
    1   saw the GP/nurse for another reason or person.

Q27 Which of the following would make it easier to see or speak to someone?

16 Patients answered "No" or "Don't know" to Q26 and could tick one or more box(es) for this question

However a total of **63** patients who answered Q26, answered Q27;
and some may answer Q26 and leave Q27 blank; and conversely some may leave Q26 blank yet answer Q27.

This table shows reponses from all patients answering this question (Q27). They could tick more than one box:

	Total No responses	% of responses to Q27	GPAQ V4 % benchmark	GPPS Benchmark
Number / % of patients responding	**63**	**43.8%**	42.5%	**22%**

Q41 How likely to recommend to Friends & Family?
- Extremely likely
- Likely
- Neither likely nor unlikely
- Unlikely
- Extremely unlikely
- Don't know

150 of the 163 patients who completed the questionnaire answered this question.

The scoring methodology is based on the underlying 'Net Promoter Score' calculation, which was considered to be the most effective at delivering the benefits of the Friends and Family Test calculated as follows to give a score between -100 and +100:

https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/214941/Friends-and-Family-Test-Publication-Guidance-v2-FOR-PUBLIC_E2_80_A6.pdf
Proportion of respondants "extremely likely" to recommend	minus	Proportion of respondants "neither likely nor unlikely", "unlikely" or "extremely unlikely" to recommend

Giving a score of **32.4** for your practice overall.

The FFT score for Stoke Aldermoor Medical Centre is **32** based on **150** responses

However, following a review, NHS England recommended (http://www.england.nhs.uk/ourwork/pe/fft/calculations/) a move away from the Net Promoter Score (NPS) and the introduction of a simpler scoring system in order to increase the relevance of the FFT data.

Based on the findings of the review, NHS England is now calculating and presenting the FFT results as a percentage of respondents who would/would not recommend the service to their friends and family.

Q41 FFT	Total Number responses	% of total
Extremely likely	63	42.0
Likely	66	44.0
Neither likely nor unlikely	11	7.3
Unlikely	4	2.7
Extremely unlikely	1	0.7

Q41 How likely to recommend to Friends & Family?
- Extremely likely
- Likely
- Neither likely nor unlikely
- Unlikely
- Extremely unlikely
- Don't know

Percentage measures is calculated as follows:

Your score:

Recommend (%)	extremely likely + likely	x100	**86.0**
	extremely likely + likely + neither + unlikely + extremely unlikely+ don't know		

Not recommend (%)	extremely unlikely + unlikely	x100	**3.3**
	extremely likely + likely + neither + unlikely + extremely unlikely+ don't know		

Sunmmary of your scores:

NPS	**32.4**	based on	150	responses
Recommend (%)	**86.0**	based on	150	responses
Not recommend (%)	**3.3**	based on	150	responses
